Your Optimal Choice for Terminal Operations, Logistics, Fabrication and Marine Support Services

AFRISHINE is a private port development, fabrication and logistics company with focus on timely, quality project & service delivery in the marine industry.

Established in 2009, our cumulative experience of over 3 decades both within and outside the shores of Nigeria gives us the capability to manage projects with ease irrespective of size or complexity.

The company has its headquarters in Lagos State, operational bases in Lagos and Port-Harcourt, while establishing partners across the country and West Africa to provide services in any location.

As part of our commitment to growth and success, we are committed to the diversification, innovation and human capacity development of its operations in achieving its objectives. We invest in experienced professionals and resources as well as provide strategic approach to project execution, attention to business risk and overarching interest in the safety of our personnel, equipment and work environment.

OUR MISSION

To continually satisfy our customers and enhance desired effect across all spectra of our business through excellence, teamwork, innovation, and transparent processes that complies with legal, statutory, and other requirements applicable in our field and business environment.

OUR VISION

To be the service partner of choice within the Maritime and Oil & Gas sectors in Nigeria and West-Africa, for both clients and employees alike, through structured approach that will support employee development and provision of excellent management solutions to clients.

OUR CORE VALUES

At AFRISHINE, we have a set of core values and tenets we hold to high esteem. These principles define who we are, the pillars against which we measure our every success, and the guiding light in our everyday actions within the business.

They've been structured to support the Company's mission and vision, hence are summarized thus:

- Excellence
- Teamwork
- Transparency
- Innovation

OUR PHILOSOPHY

WHAT WE OFFER

Terminal Operations. Logistics. Fabrication and Construction Marine Operation & Support Services

AFRISHINE Ltd was established to render professional services to the Maritime, Oil and Gas industry within Nigeria and West Africa. Our services range from terminal operations, Logistics, fabrication, coastal cargo transportation, transportation of materials, & equipment, storage of containers, oil and gas equipment etc., vessel chartering, fueling, port clearance, etc.

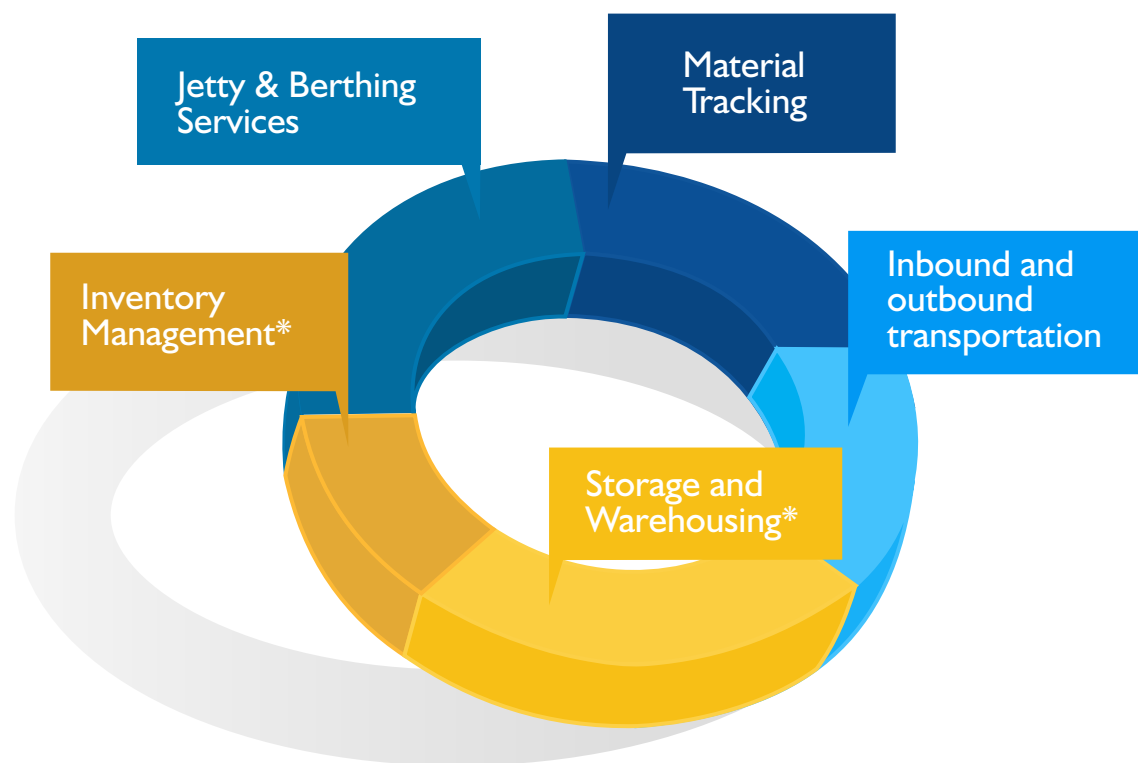

Terminal Operations

Our efficient and streamlined terminals function smoothly, thereby reducing the waiting time for ships and increasing the cargo output. Our specialized maritime port facilities primarily deal in container shipping and transshipment services.

Logistics Base Support

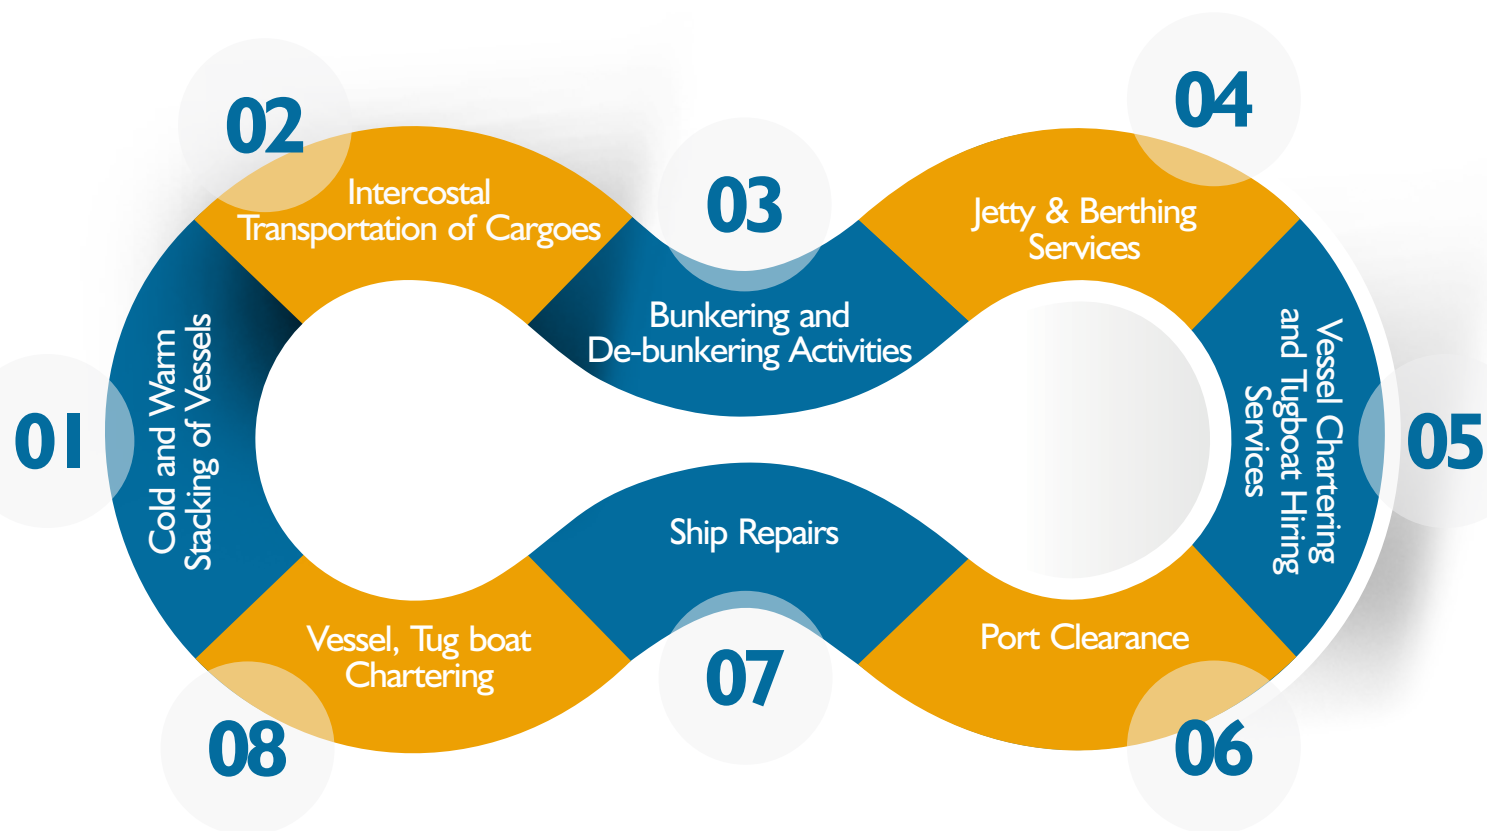

AFRISHINE is positioned to be the logistics hub of today that considers the needs of the future. When fully developed, it will command state of the art facilities that fully integrates the entire value chain making it one of the first and unique integrated Logistics Business Hub within Nigeria with the capability to support onshore and offshore activities.

OUR SERVICES

Maritime Operations and Support

Our Maritime and operations services rests on a long-term and well-articulated vision that has made it build capability and potential to deliver the following:

Fabrication and Construction (Structural and Piping)

Structural and Piping Fabrication and Construction will be one of the core services of AFRISHINE. We are investing in tangible and non-tangible assets to meet the ever-increasing competition, scale, technical complexity, and financial demands of structural and piping steelwork requirements. Processes and systems are built and validated via comprehensive solutions, field tested execution tools and models that mitigate risk and deliver predictable results.

We translate our culture of safety & excellence right from conceptualization and pre-construction stage to final project loadout/commissioning stage, placing high emphasis on constructability, planning and safety that seeks out the most efficient construction approach throughout the project life.

We have engaged industry veterans, seasoned construction professionals and proven models for our structural and piping works. The impact is the application of experience and proficiency to achieve consistent and predictable results.

Our immediate capabilities in fabrication and construction include:

- Pipelines and Flowline
- Process Pipes
- Boat Landing
- Skids and Piles
- Storage Tanks

...and more

Our Strategic Approach and People are Critical to Our Success

Our strategic approach pays attention to control points set at task levels as means of early detection and elimination of error or anomalies. This mechanism promotes efficiency, eliminate tangible and intangible wastage, helping us save time and implement contingency measures effectively and where necessary. The result is that we take full advantage of the opportunities available in the industries we operate, to provide excellent services of the highest quality that are efficient, reliable, and are of relatively low-cost.

We focus on planning and maintains proactive dashboard that supports overall project goals. This we initiate prior to project commencement using detailed Project Execution plans, Quality Control Plans and Advance Programs/Models for Project Management and Control. The Project Execution Plan together with the advanced models/frameworks provides clear technical summary, defines the strategy which we usually adopt in all our success stories.

Quality Assurance is the Best Policy to Safety

At AFRISHINE, we consider HSE an integral part of our ethos and is embedded in everything we do to ensure that risks to health and safety are properly controlled and minimized both for human and equipment dangers. We design policies that optimize workplace safety measures to continually achieve an incident-free performance.

We also comply with applicable QHSE laws, provisions, regulations, guidelines and international standards. We expect our employees, contractors and partners to embrace these principles and reflect them in every aspect of the work they perform.

Overall, we are tailor our operations to achieve the following:

- Preserve the health and safety of our employees and members of the public who may be affected by our operations.
- Minimize the impact of our operations on the environment.
- Demonstrate HSE ownership through visible leadership across the organization.
- Maintain sensitivity to the needs and concerns of host communities around our operational areas.
- Collaboration with the industry and other professional associations to continuously advance the safe management of our products and installations
